Tundra Boiler and Instrumentation Welcomes Cheminee Lining Products

Cheminee specializes in industrial free standing stacks

ALBERTA – Tundra Boiler and Instrumentation Ltd signs on **Cheminee Lining Products** for distribution. Cheminee, with more than 16 years of experience leads the market with the supply of chimneys, grease duct and gas venting products.

“Adding Cheminee Lining to our linecard rounds out our boiler and water treatment solutions; we are delighted to distribute this reputable product line,” says Iggy Domagalski of Tundra Boiler and Instrumentation Ltd.

Specializing in industrial free standing stacks and breeching systems, Cheminee can custom design solutions for any application. All stacks are manufactured according to strict ASME and CSA design and fabrication criteria.

Tundra Boiler and Instrumentation prides itself on providing the highest quality instrumentation products and services to the industrial world and offers a 100 per cent satisfaction guarantee on all parts, installation and service.

Visit www.tundrasolutions.ca for more information on Tundra products and services; visit www.chemineelining.com for specific Cheminee Lining Products.
